

Built for local florists

Stop the “where are my flowers?” calls.

Assign a driver, get photo and GPS proof the moment it's delivered, and give customers a live link to watch it happen — no more guessing, no more disputes you can't back up.

01

Enter the order

Phone, walk-in, or your own storefront — no new system to learn.

02

Assign a driver

One tap. They deliver and capture proof automatically.

03

Customer tracks live

A link that updates in real time — nothing to download.

Proof that holds up

When someone calls saying their order never showed, you'll have a timestamp, a GPS point, and a photo — not just your word against theirs.

PRICING

\$29/month

First 30 days free

GET IN TOUCH

prestondillard5233@gmail.com

Ask about a free 30-day pilot for your shop.

This is an add-on that works alongside your existing storefront/POS — not a replacement. No setup fees.
